WE ARE WATERFIELDS

On March 15 when Governor DeWine closed all restaurants to in-house patrons, we were left shell-shocked. That night we furloughed all employees and began the shutdown of all of our growing/production facilities. We cleaned 600+ pounds of basil out of our greenhouse along with literal tons of microgreens at our Mitchell Ave growing facility.

Many of you came out to receive some take-home products and support our clean-up. We shared what was the start of a seemingly crazy world for all of us in the restaurant and hospitality industry. At the time, we felt helpless and lost. I am positive you did as well.

But our big realization was that this is Cincinnati. We're 2.2 million people of hustle, grit, and determination. We are built and raised on tradition, faith, and innovation. Adversity is our city's time to SHINE.

We aren't stepping back. We aren't closing up. We're recharged and now re-inventing as a blazing, reborn phoenix. This is our city. Let's do this...together.
